

How to use the Clinic (easy guide)

Just arrived and don't know where to start? No worries. Here is everything you need to do, step by step and with no fuss. You don't need to know anything beforehand — just follow the list.

1. The Clinic gives you a diagnosis (like at the doctor's).
2. It gives you a treatment made for you.
3. You play, write and speak... and you get better.

Step by step

1 Log in without a password

Type your email and you'll get a «Magic Link». Click the link in the email and you're in. No password to remember.

2 Take your level test

This is your diagnosis. It takes about 15–20 minutes. It tells you your level (from A1 to C2) and what you struggle with most. Take your time and don't cheat: the more honest, the better it helps you.

3 Look at your diagnosis

You'll see your level and your «areas to improve» (what's hardest for you). The Clinic points you where to go next. Don't stress — you don't have to do it all today.

4 Take your «doses» in the Farmacias (Pharmacies)

Each dose (pill, syrup, vaccine...) is a mini-lesson with a short challenge. Read it, do the quick check and mark it as «taken»: that way it counts in your record.

5 Operate on your most repeated mistake (Cirugía / Surgery)

Pick that mistake you always make. You follow 3 steps (it's explained, you practise, you check it) and at the end you do an exercise. When you pass — operation complete!

6 Write in Redacciones (Essays)

You pick a topic and write. Your first essay is corrected by the AI for free and instantly. It's the best way to really see your mistakes.

7 Enter the Espacio Quinto Centenario

It's the heart of the game: you walk through Granada's history by rooms and epochs. It's governed by cerebrIA (an AI): you tell it about your life, you answer, and it weaves your «brain» of memories, which you watch grow.

8 Questions? Talk to La Doctora (the Doctor)

She's your AI tutor. Ask her anything, any time: a grammar doubt, what to do today, how to say something... She explains from your own language.

Your learning path (where do I go next?)

You don't have to decide what to do every day on your own. The Clinic guides you. And if you ever get stuck, you always have two helpers at hand:

Your diagnosis leads

After the test, your «areas to improve» appear with direct links. Always start with the top one: it's what suits you most right now.

Ask La Doctora

Write «what should I do today?» and she suggests something made for you, based on your level and your weak spots. Like having a teacher always available.

A simple routine that works

To start

Take the diagnosis and have a look around: check Recepción (Reception) and open a sample dose to see how it works.

Every day · 10–15 min

One dose from a pharmacy + one «drop» (a 1–2 minute micro-habit). A little, but every day.

Once a week

One essay (your first is corrected by the AI for free) and one Cirugía (Surgery) on your most repeated mistake.

Whenever you feel like it

Enter the Espacio Quinto Centenario and tell cerebrIA about your life: you'll watch your «brain» of memories grow.

Every 2–3 weeks

Retake the diagnosis to see how much you've improved (your first retake is free).

Feeling overwhelmed? Just do today's dose. A little every day beats a Sunday binge.

Tips so you don't get lost

You always know where you are

As you scroll, a bar with the section name stays fixed at the top. And «↑ Top» takes you back up.

The search finds everything

On Recepción (the panel's home screen) there's a search box: type what you want and it takes you straight there.

See everything, try a sample

Even without paying, you see the whole catalogue and can try a sample of each section. Locked items show a padlock 🔒.

Your first month is free

With the code LOS-ESPAÑOLES you get a free month, no card. The «plasters» (tiritas) pay for extra AI consultations.

Still unsure? It's fine to go slowly. Start with the level test and let the Clinic guide you. And if something isn't clear, ask La Doctora inside the panel.
